

# Hopping Along

Qayla and Maya go to different schools.

Each school has a 50-metre running track.

Qayla and Maya both like hopping races, where you hop along the track on one leg.

Qayla took 82 seconds to do her race.

Maya took 84 seconds to do her race.

Qayla says: "I was faster than you!"

Maya says: "Not necessarily!"

1. Why does Qayla think she was faster?
2. Why is Maya right?
